

Looking for another way to engage your ELLs? Try the Educreations app!

[Educreations](#) is an iPad app that turns your iPad into a whiteboard. Educreations is a free and easy learning app for teachers to use to teach concepts to students. It has a ton of visual and audio support, so that ELs can be well supported in their learning. Basically, it's an online whiteboard that allows you to create short instructional videos and projects for students. You can draw and [write](#) on the screen (in color), upload photographs and visuals from google images, create graphic organizers to support learning, prepare multipage lessons for students, and it allows you to use lined paper, graph paper, coordinate grid, OR white paper. Your completed lesson can be shared directly to others or made public on the Educreations website. To use with Chromebook see [this](#) tutorial and here is [additional](#) information.

For use with English learners see: [Educreations Use as an iPad App for use in Second Language Learning](#)
